Sales used in this analysis: All sales of one to three unit residences on residential lots which were verified as, or appeared to be market sales were considered for the analysis. Individual sales that were excluded are listed later in this report. Multi-parcel sales, multi-building sales, mobile home sales, and sales of new construction where less than a 100% complete house was assessed for 2005 or any existing residence where the data for 2005 is significantly different from the data for 2006 due to remodeling were also excluded. In addition, the summary above excludes sales of parcels that had improvement value of \$25,000 or less posted for the 2005 Assessment Roll. This also excludes previously vacant and destroyed property partial value accounts.

Population - Improved Parcel Summary:

	Land	Imps	Total
2005 Value	\$176,700	\$210,400	\$387,100
2006 Value	\$185,700	\$222,500	\$408,200
Percent Change	+5.1%	+5.7%	+5.5%

Number of one to three unit residences in the Population: 4,889

Summary of Findings: The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that several characteristic-based and neighborhood-based variables needed to be included in the update formula in order to improve the uniformity of assessments throughout the area. For instance, grade 9 homes or ones located in neighborhood 28 or 29 were at a higher assessment ratio than other parcels and the formula adjusts these upward less than others.

The formula adjusts for these differences thus improving equalization.

The Annual Update Values described in this report improve assessment levels, uniformity and equity. We recommend posting these values for the 2006 assessment roll.

Sales of new homes built in the last six years are over-represented in this sample. This is a common occurrence due to the fact that most new homes will sell shortly after completion. The sales sample frequency distribution for homes built before 2001 follows the population distribution closely with regard to Year Built/Ren. This distribution is ideal for both accurate analysis and appraisals.

Data Utilized

Available sales closed from 1/1/2003 through 12/31/2005 were considered in this analysis. The sales and population data were extracted from the King County Assessor's residential database.

Sales Screening for Improved Parcel Analysis

Improved residential sales removal occurred for parcels meeting the following criteria:

1. Commercially zoned parcels
2. Vacant parcels
3. Mobile home parcels
4. Multi-parcel or multi-building sales
5. New construction where less than a 100% complete house was assessed for 2005
6. Existing residences where the data for 2005 is significantly different than the data for 2006 due to remodeling
7. Parcels with improvements value, but no building characteristics
8. Others as identified in the sales deleted list

See the attached *Improved Sales Used in this Annual Update Analysis* and *Improved Sales Removed from this Annual Update Analysis* at the end of this report for more detailed information.

Land update

There were not enough vacant land sales to derive a market adjustment based only on vacant land sales. Based on the percentage change from the improved sales sample, a market adjustment for land values was derived. The formula is:

2006 Land Value = 2005 Land Value x 1.054, with the result rounded down to the next \$1,000.

Improved Parcel Update

The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living areas, views, waterfront, lot size, land problems and neighborhoods. Upon completion of the initial review, characteristics that indicated an area of possible adjustment were further analyzed using NCSS Statistical Software diagnostic and regression tools in conjunction with Microsoft Excel.

With the exception of real property mobile home parcels & parcels with "accessory only" improvements, the total assessed values on all improved parcels were based on the analysis of the 839 usable residential sales in the area.

The chosen adjustment model was developed using multiple regression. The 2005 assessment ratio (Assessed Value divided by Sale Price) was the dependent variable.

Improved Parcel Update (continued)

The analysis results showed that several characteristic and neighborhood based variables should be included in the update formula in order to improve the uniformity of assessments throughout the area. For instance, grade 9 homes or ones located in neighborhood 28 or 29 were at a higher assessment ratio than other parcels and the formula adjusts these upward less than others.

The derived adjustment formula is:

$$\text{2006 Total Value} = \text{2005 Total Value} / [0.9407433 + (0.04075849 \text{ if located in neighborhoods 28 or 29}) + (0.04218041 \text{ if grade 9})]$$

The resulting total value is rounded down to the next \$1,000, *then*:

$$\text{2006 Improvements Value} = \text{2006 Total Value} \text{ minus } \text{2006 Land Value}$$

An explanatory adjustment table is included in this report.

- Other:
- * If multiple houses exist on a parcel, the Total % Change indicated by the sales sample is used to arrive at new total value (Previous Total Value * 1.054 – 2006 Land Value=New Improvement Value).
 - * If “accessory improvements only”, the Total % Change as indicated by the sales sample is used to arrive at a new total value. (Previous Total Value * 1.054 – 2006 Land Value=New Improvement Value).
 - *If vacant parcels (no improvement value) only the land adjustment applies.
 - *If land or improvement values are \$25,000 or less, there is no change from previous value. (Previous Land value * 1.00 Or Previous Improvement value * 1.00)
 - *If an improvement is coded “% net condition” or is in “poor” condition, there is no change from previous improvement value (only the land adjustment applies).
 - *If residential properties exist on commercially zoned land, there is no change from previous value. (2006 total value = 2005 total value)

Model Validation

Ratio studies of assessments before and after this annual update are included later in this report. “Before and after” comparison graphs appear earlier in this report.

Area 42 Annual Update Model Adjustments

2006 Total Value = 2005 Total Value + Overall +/- Characteristic Adjustments as Apply Below

Due to rounding of the coefficient values used to develop the percentages and further rounding of the percentages in this table, the results you will obtain are an approximation of adjustment achieved in production.

% Adjustment	-4.56%

Neighborhood 28 or 29	Yes

% Adjustment	-4.41%

Comments

The % adjustments shown are what would be applied in the absence of any other adjustments.

For instance, a grade 9 home would *approximately* receive a 1.74% upward adjustment (6.30% - 4.56%).

87% or 4,269 of the population of 1 to 3 unit residences in the area are adjusted by the overall alone. There are 730 sales of this type of property.

92 of the population of 1 to 3 units residences are grade 9 in quality. There are 33 sales of this type of property.

542 of the population of 1 to 3 units residences are located in neighborhoods 28 or 29. There are 77 sales of this type of property.

Area 42 Annual Update Ratio Confidence Intervals

These tables represent the percentage changes for specific characteristics.

A 2006 LOWER 95% C.L. greater than the overall weighted mean indicates that assessment levels may be relatively high. A 2006 UPPER 95% C.L. less than the overall weighted mean indicates that assessment levels may be relatively low. The overall 2006 weighted mean is 0.981 .

The confidence interval for the arithmetic mean is used as an estimate for the weighted mean.

It is difficult to draw valid conclusions when the sales count is low.

Scott Noble
Assessor

MEMORANDUM

DATE: February 15, 2006

TO: Residential Appraisers

FROM: Scott Noble, Assessor

A handwritten signature in black ink that reads "Scott Noble".

SUBJECT: 2006 Revaluation for 2007 Tax Roll

The King County Assessor, as elected representative of the people of King County, is your client for the mass appraisal and summary report. The King County Department of Assessments subscribes to the Uniform Standards of Professional Appraisal Practice 2005. You will perform your appraisals and complete your summary mass appraisal reports in compliance with USPAP 2005. The following are your appraisal instructions and conditions:

1. You are to timely appraise the area or properties assigned to you by the revalue plan. The Departure Provision of USPAP may be invoked as necessary including special limiting conditions to complete the Revalue Plan.
2. You are to use all appropriate mass appraisal techniques as stated in USPAP, Washington State Law; Washington State Administrative Code, IAAO texts or classes.
3. The standard for validation models is the standard as delineated by IAAO in their Standard on Ratio Studies (approved 1999); and
4. Any and all other standards as published by the IAAO.
5. Appraise land as if vacant and available for development to its highest and best use. The improvements are to be valued at their contribution to the total.

6. You must complete the revalue in compliance with all Washington and King County laws, codes and with due consideration of Department of Revenue guidelines. The Jurisdictional Exception is to be invoked in case USPAP does not agree with these public policies.
7. Physical inspections should be completed per the revaluation plan and statistical updates completed on the remainder of the properties as appropriate.
8. You must complete a written, summary, mass appraisal report for each area and a statistical update report in compliance with USPAP Standard 6.
9. All sales of land and improved properties should be validated as correct and verified with participants as necessary.
10. You must use at least three years of sales. No time adjustments to sales prices shall be made to avoid any possibility of speculative market conditions skewing the basis for taxation.
11. Continue to review dollar per square foot as a check and balance to assessment value.
12. The intended use of the appraisal and report is the administration of ad valorem property taxation.
13. The intended users include the Assessor, Board of Equalization, Board of Tax Appeals, King County Prosecutor and Department of Revenue.
